

Climate Protection Certificate 2020

Cosnova GmbH

used the following quantities of procyclen® and recythen®:

Type	Quantity (t)
procyclen® PP40 M12 C05 F13	82.92

Based on these quantities the calculated
greenhouse gas savings were 82.92 tons!*
This corresponds to the average annual CO₂ emission of
43 cars!**

1 757 821 kWh of primary energy were also saved!
This corresponds to the annual electricity consumption of 116 3-person households!***

We would like to thank you on behalf of the environment and climate protection!
